- Free Customer Wind-Loading Advice

1.2m Curtains

1.8m Blankets

3.6m Quilts

The UK Law on Noise Control

HSE have issued daily and weekly exposure limits levels of noise (decibels) that people can be exposed to:

80dB	85dB
No more than 4 hours daily of decibel exposure	No more than 2 hours per day of decibel exposure

*Employers have a legal obligation to ensure these noise exposure levels are **not exceeded***

Whilst ear defenders can be an effective temporary solution for noise control, collective noise reduction – such as Silent Site acoustic barriers – ensure noise is reduced at source – minimise requirement for further noise control.

Remember once you have damaged your hearing it cannot be recovered.
